Asthma Inhalers at School

To: Parent/Guardian of children using inhalers at school

Option #1

The student will be allowed to carry his/her own inhaler and use it without supervision.

Advantage: The medication is immediately accessible. This also allows older students to have access during after school activities.

To utilize this option, you will need to submit a completed STUDENT MEDICATION/ TREATMENT AUTHORIZATION FORM **AND** the AGREEMENT FOR SELF-MEDICATING ASTHMATIC STUDENTS form. You may provide a spare inhaler to keep in the nurse's office if you wish to do so.

Option #2

The child comes to the nurse's office where the inhaler is stored and uses it under supervision.

Advantage: This will ensure the medication is used correctly, in the proper amount, and the doses will be documented.

To utilize this option, you will need to submit a completed STUDENT MEDICATION/ TREATMENT AUTHORIZATION FORM. Please provide the inhaler with the proper medication label.

Please contact your nurse's office if you have any questions or concerns.
